Opensoft Payroll is a Client-Server based payroll that is designed to integrate seamlessly with eOpensoft. It takes care of tedious and time-consuming paperwork required for your payroll administration, all while ensuring your payroll is done accurately, in compliance with the statutory requirements and is approved by CPF board. Opensoft Payroll caters to IR8A online submission to IRAS (Auto Inclusion) & most banks in Singapore for employee salary transfer (online bank GIRO).

Spend less time entering payroll data

With Opensoft payroll software you only require to manually enter the additional pay details that are not included in employees' usual pay. Opensoft Payroll comes with options to sync attendance records directly to Opensoft Time & Attendance, and to sync leave/absence records from Opensoft Leave Management – thereby reducing errors, abolish the need for manual re-keying and speed up payroll processing altogether.

Easy management of pay and entitlements

We are always on the lookout for regulatory updates so you can be assured that all your pay calculations are in compliance with the statutory requirements for Singapore and Malaysia businesses. Accurately accrue leave by the hour, day or by pay and choose how to calculate an unlimited number of allowances and deductions with total flexibility.

Key Features

Ease of Use
Simple data entry that even a first time payroll user will be able to perform

Customizable Setup
Up to 20 additional pay fields to define for each employee to track allowances and/or deductions over the default Basic, Overtime, No Pay Leave, statutory funds to suit your organisation needs.
