Simplify your time tracking

No more paper, no re-keying, fewer errors. Opensoft Time & Attendance features a powerful and easy to use interface which gives you greater control and instant real time insight to effectively manage your company's time attendance data virtually anywhere, dramatically reducing the number of hours required to process employee time & attendance and automatically calculating total worked hours including overtime, vacation, sick days and holidays. Our reporting solutions empower you with informed real time decision making capabilities so you can easily convert data into actionable, valuable information.

Control labor cost & start saving money today

The more accurate your time-tracking, the more accurate your payroll and overall data will be. The Time & Attendance module of Opensoft helps you eliminate calculation errors by enabling you to accurately calculate hourly totals and automatically apply for overtime policies accordingly, as well as maintaining your compliance with labor laws. Retrieving attendance data from multiple sources requires a lot of time and work. Opensoft Time & Attendance eliminates all errors derived from manual entries and helps you save time by integrating with VIRDI biometric access control systems to manage all your data in one central location.

Eliminate employee time theft

Opensoft Time & Attendance also helps you reduce time theft by applying rounding rules and restricting schedules, as well as eliminating the common problem of buddy punching when using VIRDI biometric access control systems.

Browser based interface

Opensoft Time & Attendance module allows employees and administrators to easily access the application through a web-browser, so that everyone in your company remains connected at all times. With Opensoft Self-Service module, Opensoft Time & Attendance enables your employees to track their time and attendance easily on their mobile smartphones.

Powerful payroll interface capabilities

We understand the stress put on an individual or HR staff in charge of the tedious task of processing payroll. Opensoft time & attendance software is integrated with Opensoft leave management and payroll module.

Do you have an existing Payroll system?

Not a problem! You will still be able to integrate Opensoft with your Payroll system as time information from Opensoft Time & Attendance system can be used and exported to CSV, XLS for third-party software interface directly to your existing Payroll system.

Powerful reporting and analytics

Gain complete visibility with Opensoft reporting solutions which empower you with informed real time decision-making capabilities so you can easily convert data into actionable, valuable information. Instant access for managers and executives to reporting, query, and analysis tools enables your organization to proactively manage your business needs.

Unrivaled after sales support

People are more powerful than technology. Even the most innovative tools are meaningless without a team of experts behind them. That's why we provide unrivaled after sales support that moves way beyond standard troubleshooting.
